

ZERO + DPC

Elevating Care. Maximizing Plan Savings.

To build a sustainable healthcare strategy, employers need a solution that balances high-quality, personalized care with predictable costs. By integrating Direct Primary Care (DPC) directly into the ZERO ecosystem, we solve your biggest HR headache: point-solution fatigue. We deliver a single, cohesive clinical program that drives real utilization without requiring your internal team's bandwidth.

More Time for Patients: Small patient panels mean unhurried 20–60 minute visits and same/next-day appointments.

In-Office Capabilities: Routine testing and diagnostics are performed right inside the clinic, covered under your predictable monthly DPC fee.

Lower Site-of-Service Costs: Handling complex care in-office naturally saves both the member and the health plan time and money.

ZERO + DPC = Savings Multiplier

2.5x

2.5x Engagement through Provider-Led Savings

Employers pairing DPC with ZERO experience **2.5x higher overall utilization** of their ZERO benefit. Removing the burden from members to advocate for ZERO, their DPC provider intentionally steers care straight to ZERO.

Comprehensive Cost Protection

Patients with a dedicated PCP already see **27.4% lower annual total costs**. ZERO locks in those savings by protecting the plan from inflated costs when those patients require advanced external care.
